Approved Software Means Improved Processing for Tennessee Taxpayers

Paper tax returns that are scannable can be processed more easily and at a lower cost than returns that are not scannable. Below is a list of approved developers who have worked with the Tennessee Department of Revenue for the 2018-2019 filing period to produce versions of returns that are easier and less costly to process.

This list will be updated at least weekly throughout the approval process period. Approvals on some returns types normally begin in October and continue to be added into January.

Approved Software Developers of Scannable TN Tax Returns for 2018-2019 Filing Season
